EasyCoat

Flüssiglaminator

Easy to use Product...

NEW, now 62 inch available...

The **EasyCoat** is the ideal Liquid Laminator for the price-sensitive customer... The **EasyCoat** is one of the first inexpensive and easy to use Liquid Laminators on the world market. It can't be missed by each Sign-Maker or digital photo laboratory.

The New DAIGE **EasyCoat** protects your Large Format Prints on Scrimm Banner, Canvas- or Vinyl-Media. No other Liquid Laminator offers so many advantages by this small money employment.

- ✓ Protects your Digital Prints against water, mechanical abrasion and UV-Light
- ✓ Strengthens the color brilliance of your ink and improves thereby your digital print.
- ✓ More economically than a laminating with UV - foil laminates
- ✓ Your digital print keeps its flexibility and remains easily processable.
- ✓ Faster and cleaner than spraying or rolling of liquid laminate.
- ✓ With suitable media you receive a precise coating with smallest laminate consumption and lowest media consumption.
- ✓ You must not be an expert when laminating, the **EasyCoat** works fast and very simply...

Pour 1,5 - 2 Liter Daige Rollaguard gloss or satin coating into the tray. Swivel the coating rod up and insert your media over the tray. Please note, that minimum of 10 cm blank material must be first of the print, that you can touch it for laminating.

Swivel the coating rod down and the media is submered in the coating. Pull it through and you receive a perfect coating on the image, while it stays completely dry on back. Please stay the laminated print on an even place for about 5 minutes. It takes 24 hours for completely drying. When finished, drain the coating back into the bottle and wipe down the coating rod with water.
