Quickmount Cold Laminator / Mounter

Easy to use Product...

The **Quickmount 4**, an affordable cold laminator / mounter

The **Quickmount 4**, our newest Modell for laminating and mounting with a maximum width of about 1400 mm gives you a flexible solution for a unbelievable price, without expence of quality and durability

Picture shows you the Quickmount 4 with integrated Roll holder

- ✓ The Quickmount 4 with new design and best features...
- ✓ It is ruggedly built from steel and alluminium with a heavy duty motor.
- ✓ The large diameter of the laminating roller gives you perfect pressure for laminating and mounting
The rollers are extremly durable and can last for years
- ✓ You do not need to be an expert for laminate with the new Quickmount 4 laminator...
It´s easy and very fast...
- ✓ With the two knobs you can adjust the height of the rollers and the pressure...
- ✓ Holder and flanges for the laminate and the silicone paper are delivered with the machine
- ✓ New at **Quickmount 4**, the media holder at the front side of the machine
- ✓ Optional you can have a footswitch with the machine, for hands free working
- ✓ Optional you can have a free stand for the new Quickmount 4...

Quickmount 4

On the left, you can see the Quickmount 4 during laminating your digital prints... The silicone paper is wound up automatically... in the front, you see the new media holder...

Two knobs set the height and pressure of the top roller...

For mounting, Quickmount 4 rolls down media to boards and other substrates, smoothly and easily. The maximum thickness of boards you can mount is about 25,4 mm.

On the right you can see the optional free stand for Quickmount 4... The new stand gives you more mobility in your office...

Optional Foot Switch
